

Laboratory complex of Limited Liability Company "Production company "OKA"" has the competence to implement

- a full range of mechanical tests of metal, welding and surfacing material;
- metallographic diagnostic of metal;
- spectrum analysis of metal;
- determination of corrosion resistance of metal;
- ultrasonic testing of metal;
- radiographic control of basic material and welded joints
- liquid penetrant testing of welded joints;
- making of all types of samples for the above tests;
- The company has the ability to conduct a full cycle of hydraulic and pneumatic test of pipeline valves and leak tightness by helium leak detector and provide additional services for the phosphating of details, shot peening, coating, repair of pipeline valves.

THE COMPANY "OKA"

LABORATORY COMPLEX

Address 606100, Nizhny Novgorod Region,
Pavlovo, st. Alleia Il'icha, 43
Phone/ (831-71) 5-75-44, 5-76-06, 5-73-43
Fax (831-71) 5-73-48
E-mail: lab@okapf.ru
WWW.OKA-PF.RU

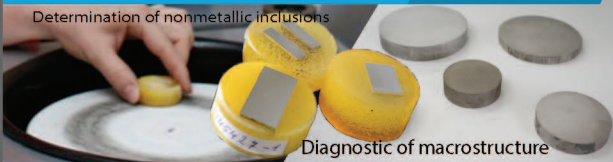

Testing of basic metal and welding materials

Spectrum analysis

Metallography

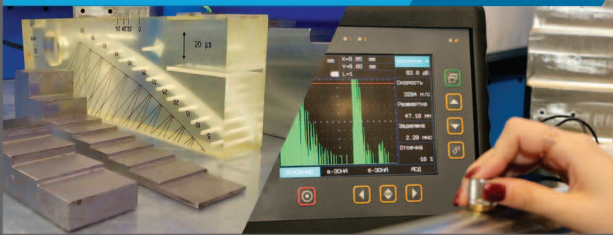

Testing of mechanical properties

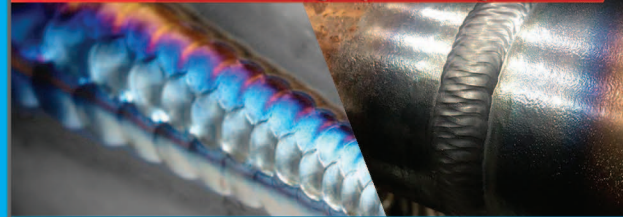

Testing of corrosion resistance

Ultrasonic testing

Quality control of welded joints and building-up welding

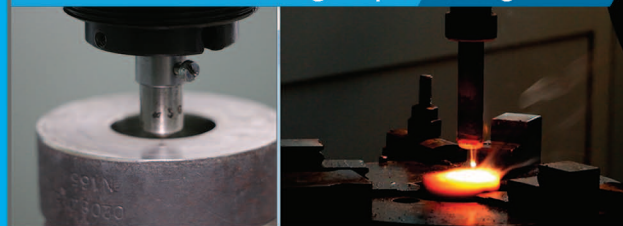

Ferrite content check

Radiographic control

Measurement of hardness of building - up welding

Liquid-penetrant testing

Testing of pipeline valves, gate valves and other aggregates by pressure

Leak tightness control of sealing joints by helium leak detector

Leak tightness control of welded joints by helium leak detector

Hydraulic tests

Pneumatic tests

Modern test equipment
